

Competition Management System

Administrator Guide

Complete guide for system administrators to manage users, students, competitions, and system settings

Version 1.0 | April 2026

Table of Contents

1. Dashboard Overview
2. User Management
3. Student Database
4. Upload Students
5. Freeze Management
6. System Settings
7. Sidebar Navigation

1. Dashboard Overview

The Admin Dashboard is the landing page after login. It provides a quick overview of system statistics and quick action cards to navigate to common tasks.

UI Element	Type	What It Does
Total Users card	Info Card	Shows count of coordinators & teachers. Click to go to User Management.
Total Students card	Info Card	Shows total students across all classes. Click to go to Student Database.
Competitions card	Info Card	Shows number of active competitions.
Create User	Quick Action	Click to navigate to User Management to add a new coordinator or teacher.
Upload Students	Quick Action	Click to navigate to the CSV upload page for importing student data.
System Settings	Quick Action	Click to navigate to Settings page for backup, theme, and storage configuration.

2. User Management

This page allows you to create and manage user accounts for Coordinators, Department In-Charges, and Teachers. Only administrators can access this page.

UI Element	Type	What It Does
Create User button	Button	Opens a form to create a new user account with email, password, name, and role.
Role dropdown	Dropdown	Select the role: Coordinator, Teacher, or Department In-Charge.
Department dropdown	Dropdown	Appears only when 'Department In-Charge' role is selected. Choose the department.
User list table	Table	Displays all created users with their name, email, and role.
Delete button	Action	Remove a user from the system (use with caution).

How to Create a New User

Step 1: Click the 'Create User' button at the top of the page.

Step 2: Fill in the user's Full Name, Email address, and a temporary Password.

Step 3: Select the appropriate Role from the dropdown (Coordinator, Teacher, or Dept In-Charge).

Step 4: If 'Department In-Charge' is selected, choose the department (External, Internal, Sports, Other).

Step 5: Click 'Create' to save. The user can now log in with the provided credentials.

Note: Users should be instructed to change their password after first login using the 'Change Password' option.

3. Student Database

View and manage the complete student database. Students are organized by academic year, class, and section.

UI Element	Type	What It Does
Search bar	Input Field	Search students by name, admission number, or other details.
Academic Year filter	Dropdown	Filter students by academic year (e.g., 2025-2026).
Class filter	Dropdown	Filter by class number (1-12).
Section filter	Dropdown	Filter by section (A, B, C, etc.).
Student table	Table	Displays S.No, Admission No, Name, Class, Section, DOB for each student.
Export button	Button	Download the filtered student list as a CSV/Excel file.

4. Upload Students

Import student data from a CSV file. This is typically done at the beginning of each academic year.

UI Element	Type	What It Does
File upload area	Drop Zone	Drag and drop a CSV file or click to browse and select a file.
Academic Year selector	Dropdown	Choose the academic year for the uploaded students.
Upload button	Button	Start the upload process after selecting a file.
Validation results	Info Panel	Shows any errors found in the CSV (missing fields, invalid data).

How to Upload Student Data

Step 1: Prepare a CSV file with columns: S.No, Admission No, Name, Class, Section, DOB.

Step 2: Navigate to the Upload page from the sidebar.

Step 3: Select the correct Academic Year.

Step 4: Drag and drop your CSV file or click to browse.

Step 5: Review any validation errors shown. Fix the CSV and re-upload if needed.

Step 6: Click 'Upload' to import the data into the database.

Note: CSV format: Ensure dates are in YYYY-MM-DD format. Class should be a number (1-12).

5. Freeze Management

Freeze or unfreeze the system for a specific academic year. When frozen, non-admin users cannot make any changes.

UI Element	Type	What It Does
Freeze toggle	Switch	Toggle to freeze/unfreeze the current academic year.
Academic year display	Label	Shows which academic year the freeze applies to.
Status indicator	Badge	Shows current status: Frozen (red) or Active (green).

Note: When the system is frozen, coordinators, department in-charges, and teachers will see a 'System Frozen' overlay and cannot access any functionality. Only the admin can unfreeze.

6. System Settings

Configure system-wide settings including appearance, storage, and backup/restore.

UI Element	Type	What It Does
Theme toggle	Switch	Switch between Baby Blue theme and Dark Mode. Preference is saved.
Google Drive Path	Input Field	Set the Google Drive folder path for storing competition data.
Save Settings button	Button	Save the storage settings.
Download Backup	Button	Download a complete JSON backup of all system data.
Restore from Backup	Button	Upload a previous backup file to restore all data (destructive operation).
User Guides section	Card	Download PDF user guides for each role.

Note: Always download a backup before performing a restore operation. Restore replaces ALL existing data.

7. Sidebar Navigation

The sidebar on the left provides quick navigation to all admin pages.

UI Element	Type	What It Does
Dashboard	Menu Item	Navigate to the main dashboard overview.
User Management	Menu Item	Manage user accounts (create, view, delete).
Student Database	Menu Item	View and search the student database.
Upload	Menu Item	Upload student data from CSV files.
Freeze	Menu Item	Manage academic year freeze status.
Settings	Menu Item	Access system settings, backup, and theme.
Sign Out	Button	Log out of the system.
